Watch Dr. Kundu speak  
about Endovenous Laser  
Ablation at  
elevatemagazine.com

**Dr. Kundu, The Medical Director of The Vein Institute of Toronto** is specialized in minimally invasive image guided interventions, with an expertise in ultrasound guided endovenous laser ablation for the treatment of venous insufficiency for leg varicose veins, and light guided laser and sclerotherapy for leg, hand and facial spider veins. Dr. Kundu is also active staff at Scarborough Hospital and Medical Director of Scarborough Vascular Ultrasound.

**Dr. Sanjoy Kundu** BSc, MD, RVT, FRCPC, RPVI, FASA, FCIRSE, FSIR completed medical school and residency in Diagnostic Imaging at the University of Toronto. Following this, he completed a Fellowship in Angiography and Interventional Radiology (Minimally Invasive Image Guided Procedures) at the University Health Network in Toronto. He is a certified and active Fellow of the Royal College of Physicians and Surgeons. He is also board certified by the American Board of Radiology. Dr. Kundu is one of the few physicians in Canada to be certified by the American Board of Phlebology in 2010 to specialize in vein treatments.

**He is a member of the** Radiological Society of North America, the Society of Interventional Radiology, the American College of Phlebology, the American Society of Angiology, the Cardiovascular and Interventional Radiological Society of Europe, the American College of Radiology and the Canadian Interventional Radiology Society.

**Dr. Kundu has been awarded** Fellowship in the American Society of Angiology, Cardiovascular and Interventional Radiological Society of Europe and Society of Interventional Radiology for his contribution to Venous Medicine and advancement in treatment techniques. Currently he is involved in giving lectures worldwide on the technique and most recent advancements in Endovenous Laser Ablation for varicose veins and the latest treatment techniques for spider veins. As an interventional radiologist by training he is specialized in endovascular procedures both in the venous and arterial systems using ultrasound or x-ray guidance.

#### Medical Certification:

Certified by the College of Physicians & Surgeons of Ontario. A Fellow of the Royal College of Physicians & Surgeons of Canada. Diplomate of the American Board of Radiology and American Board of Phlebology.

#### Medical Degree:

Completed Doctor of Medicine Degree at the University of Toronto

#### Residencies:

Completed residency in Diagnostic Imaging at the University of Toronto, and completed fellowship in Interventional Radiology at the University Health Network at the University of Toronto

#### PROFESSIONAL RECOMMENDATIONS

1. Varicose and spider veins are commonly caused by a family history, pregnancies and prolonged standing and sitting.
2. A proper venous assessment including ultrasound if indicated is critical to develop an appropriate treatment plan.
3. There are many minimally invasive outpatient treatment options for the treatment of varicose veins as an alternative to conventional surgical stripping under general anesthesia.
4. Endovenous laser ablation is a minimally invasive ultrasound guided procedure, indicated for the treatment of varicose veins in patients with venous reflux.
5. To reduce the occurrence of varicose and spider veins, prolonged standing or sitting should be avoided.
